SUMMARY

Software Developer with a degree in Programming (UTN FRGP) and hands-on experience building production applications with React Native, Firebase and Node.js. Able to work end-to-end — from architecture to deploy — proven through personal projects. Technical background complemented by team leadership and process improvement experience. Currently seeking opportunities in software development.

EXPERIENCE

Junior Software Developer

Body Health SA — medical aesthetic equipment company · December 2024 – May 2026 · On-site

- Development and maintenance of web applications with React and JavaScript
- REST API integration (Firebase, internal services)
- Resolution of complex bugs in legacy code and new features
- Diagnosis and resolution of memory leak

Team Leader

Body Health SA · 2021 – 2024 · On-site

- Leadership of 8-person team in electronics manufacturing
- Reduction of manufacturing times through process redesign and workflow optimization
- Documentation and standardization of production processes
- Team training and development

Electronics Operator

Body Health SA · 2016 – 2021 · On-site

- Quality control of medical aesthetic equipment
- Complex hardware assembly

EDUCATION

Higher Technician in Programming

UTN FRGP · 2020 – 2024 · Graduate

Bachelor in Natural Sciences

Colegio San Ramón · 2009 – 2011

FEATURED PROJECTS

FlowCash — Personal Finance App

React Native + Firebase · In development · iOS & Android

- Personal finance app with BCRA integration for real-time exchange rates
- Freemium system with RevenueCat (in-app purchases)

Viajes La Maleta — Travel Tech Startup

React Native + Node.js + Firebase · Active

- Sole developer — full architecture, development and deploy
- Freelance project in development — custom travel platform

- Automatic translation API integration — support in 3 languages: Spanish, English, Catalan
- Custom Node.js backend

Educational Games — Personal Project

HTML + CSS + JavaScript · Completed

- Suite of interactive learning games
- Clean architecture, performance optimization

TECHNICAL SKILLS

Languages: JavaScript (expert), Python, C/C++, HTML/CSS, SQL

Frontend: React, React Native, Quasar, Vite, advanced CSS, responsive design

Backend: Node.js, Firebase (Firestore, Auth, Storage), REST APIs

Tools: Git/GitHub, VSCode, Figma, Expo, Android Studio, Chrome DevTools

Methodologies: Agile, remote work, distributed environments

Currently learning: TypeScript

LANGUAGES

Spanish — Native

English — Intermediate (spoken and written) — actively improving

SOFT SKILLS

Methodical · Team player · Leadership · Proactive · Creative problem solving · Assertive communication · Organized · Adaptable · Self-managed
